CS361: Assignment 5: Milestone #1 Implementation

Overview

Implementation begins! Following your Sprint 1 plan, **implement Milestone #1**.

Instructions

Complete each item below by replacing the <mark>highlighted text</mark> (**Usability note**: double-click the text to select it).

1. **Milestone #1**
   Implement the milestone, then create a **short video** showing it (**5 minutes or less**). Embed the video in your submission

   Milestone #1 requirements:

   - At least three user stories completed

   - All features that are part of the milestone must be working. The milestone should not have partially completed features.

   - Has a way for users to interact (for example, there is a way for users to provide input or there is a button they can push that has an effect)
   - Correctly reflects each Inclusivity Heuristic
   - Correctly reflects three quality attributes you choose (show that your non-functional requirements are satisfied)
   Video must show that the implementation meets the requirements.

   - To demonstrate that a user story is completed, show and explain where and how its functional acceptance criteria are satisfied.

   - To demonstrate that a feature is working and can be interacted with, show each feature and, if it is interactable, show the interaction.

   - To demonstrate that the Inclusivity Heuristics are correctly reflected, show and explain where and how each is correctly reflected in your UI.

   - To demonstrate that the quality attributes are correctly reflected, show and explain where and how each is correctly reflected in either your UI or elsewhere in your project.

2. **GitHub**

   Create a **GitHub release** that contains your code. It should have a **version number**. Provide a **screenshot** of your release. Instructions for creating release:
   https://docs.github.com/en/repositories/releasing-projects-on-github/ managing-releases-in-a-repository

Submission

PDF or Word format via Canvas. **Embed video**.

For video, you must follow instructions at Modules > "HOW TO: Create and Upload a Video".

For document, you must follow instructions at Modules > "Attach a Document to "Text Entry" Field".

Grading

You are responsible for satisfying all criteria listed in the Canvas rubric for this assignment. You will be able to revise this assignment if you miss points.
